General Description

The LWO-AOC-SFPP-xx series constitutes a range of SFP+ active optical cables (AOCs) specifically engineered for 10 Gigabit Ethernet (10GbE) networking applications. These 10G SFP+ AOC cables serve as an optimal alternative to SFP+ direct-attach copper cables (DAC) and short-reach SFP+ transceivers, simultaneously delivering enhanced signal integrity and superior cost-performance ratios. Their design emphasizes high data transmission speeds, high port density, and minimal power requirements to address contemporary demands in data center infrastructure. Each AOC integrates SFP+ optical transceivers at each end coupled with OM3 multimode fiber cables available in lengths ranging from 1 to 300 meters. Additionally, they incorporate digital diagnostic capabilities accessible through a 2-wire serial interface as outlined in the SFF-8472 specification. All functional parameters maintain strict adherence to industry-standard protocols while optimizing operational efficiency across diverse deployment scenarios.

Notes

1. Circuit ground is internally isolated from chassis ground.
2. TFAULT is an open collector/drain output, which should be pulled up with a $4.7k\Omega$ - $10k\Omega$ resistor on the host board if intended for use. Pull up voltage should be between 2.0V to $V_{CC} + 0.3V$. A high output indicates a transmitter fault caused by either the TX bias current or the TX output power exceeding the preset alarm thresholds. A low output indicates normal operation. In the low state, the output is pulled to $<0.8V$.
3. Laser output disabled on TDIS $>2.0V$ or open, enabled on TDIS $<0.8V$.
4. Should be pulled up with $4.7k\Omega$ - $10k\Omega$ on host board to a voltage between 2.0V and 3.6V. MOD_ABS pulls line low to indicate module is plugged in.
5. Internally pulled down per SFF-8431 Rev 4.1.
6. LOS is open collector output. It should be pulled up with $4.7k\Omega$ - $10k\Omega$ on host board to a voltage between 2.0V and 3.6V. Logic 0 indicates normal operation; logic 1 indicates loss of signal.
